# Welcome To The Eye Specialty Group

We understand how important vision is, and take great lengths to ensure the best outcome for your patients. In order to provide the best care for your patients, ESG takes part in state-of-the-art clinical trials for conditions such as macular degeneration. Our board certified ophthalmologists have completed fellowships in vitreoretinal surgery and enhanced their skills through many years of experience. We trust that you will find our care and services to be both compassionate and outstanding.

Did you know Eye Specialty Group has a hotline just for you?

## ESG Retina Services Facts:

- In addition to relocating retina services to the 5350 Poplar Building, the retina department has also converted the adjoining AAAHC accredited ambulatory surgery center into the regions only retina specific ASC providing ability to perform vitreoretinal procedures in emergency situations as well as controlling quality assurance by staffing with ESG employees.
- Patients returning to ESG for a routine monthly intravitreal injection spend, on average, less than 33 minutes in the practice. We are working hard to reduce that time to under 30 minutes.
- Our clinical technicians all receive Certified Ophthalmic Assistant certification through the Joint Commission on Allied Health Personnel in Ophthalmology (JCAHPO).
- Full-service retinal and surgical care provided all under one roof.

Eye Specialty Group is ready to partner with you to bring your patients' lives back into focus
